

VIDEO & IMAGE CAPTURE | PASSWORD SECURE

Omnivore v1.5 Released – 10-20-2011

Ocean System is pleased to announce the release of Omnivore v1.5
This is a free upgrade to all Omnivore customers.

Summary of Updates

- 1) Video Capture has been Turbo Charged
- 2) Optimization Wizard updated with contextual suggestions to increase capture times
- 3) Reset Overlay added to main capture overlay and the Utilities Tab
- 4) QuickSave™ – Save large capture files instantly
- 5) Recovery – Restore captures that were interrupted
- 6) Batch Processing of OMV to QuickTime (MOV), TIFF and BMP
- 7) Updated User Guides including a new Linux DVR Capture Guide

Now first responders and experienced analysts alike can go on location with confidence that they can quickly walk away with an uncompressed copy of the evidence they need to investigate the case. With Omnivore, you have the ability to capture video evidence directly from the system that recorded it without any dropped frames. Once captured, you can instantly view your evidence without needing to install hard-to-find proprietary viewers. Omnivore also provides on board help with an integrated overview video, prompts, and user's guide so learning to do precision captures doesn't require extensive training. The combination of affordability, ease-of-use, and portability makes Omnivore the ideal tool to outfit an entire agency. First responders can now provide a forensic video analyst an uncompressed copy of the original evidence that can be immediately viewed and evaluated to determine if further processing is needed.

About Ocean Systems

Since 1999, Ocean Systems has been providing video, image and audio clarification and analysis solutions to law enforcement. Since then our solutions has become an industry standard for Local, State and Federal Agencies in the US and around the world.
