**Ocean Systems Announces New Three Day DVR Assessment and Video Recovery Training Course**

*Law Enforcement students will perform evidentiary video recovery from multiple different DVR's using various methods and techniques, to include exporting the native files, copying of the original recorded files, video capture, network connectivity & acquisition and exporting.*

**Burtonsville, MD February 3, 2014** – Ocean Systems, the market leading provider of forensic video analysis solutions, announced today a new training course, DVR Assessment and Video Recovery.  This class will provide students with an overview of the multiple challenges that may arise when acquiring digital video evidence using multiple techniques. It has been developed based on the Law Enforcement & Emergency Services Video Association (LEVA)'s "Best Practices for the Acquisition of Digital Multimedia Evidence", with consideration also given to various other industry related guidelines and best practices.

This 3-day course will also provide instruction on Ocean Systems latest solutions for DVR recovery and digital evidence management, to include Omnivore, the Omnivore Field Kit, and Ocean Systems' soon to be released digital evidence management solution.

The first class will be held in Tacoma Washington at the Tacoma Police Headquarters April 8-10, 2014.  The instructors will be Larry Compton and Edward Baker who are both Certified Forensic Video Analysts with extensive Law Enforcement backgrounds and who are recognized instructors on various digital and multimedia evidence topics.

Upon successful completion of this course participants will be familiar with common technical and legal issues related to the acquisition and use of digital video evidence. The learning environment consists of lectures, real world examples, and hands-on exercises.  Anyone completing this course will be provided a certificate of completion (worth 24 hrs. of Vendor Training) which can be applied towards a LEVA certification.

<u>Who Should Attend:</u> This course is recommended for anyone who will be responsible for the recovery of digital video evidence from CCTV systems.
